

STUDENT ATHLETE TRANSFER SCREENING

Over **1/3rd** of all student athletes will transfer to another institution at some point within the next six years of school¹. Chances are, your university has seen a fair share of these student athlete transfers.

With the current national spotlight on many of these student athletes and their conduct on and off the field, it is up to academic institutions to ensure that their student athlete transfers aren't bringing misconduct and/or criminal records with them that would prevent them from competing, result in suspension, or even criminal charges.

Properly screening these athletes is a first line of defense to ensure that your student athletes reflect the core values of your institution and its mission.

Here's what you need for a well-rounded screening program:

Criminal OmniSearch

Searches county court records based upon your athlete's social security number validation

Quality Assurance thoroughly reviews results to confirm identity and record completeness

Researches official court records to ensure compliance with federal and state regulations

Sex Offender Registry

Pulls information from every official sex offender registry in the country

Every identified record is routed to Quality Assurance for review

Average turnaround time is instantaneous

Using a criminal OmniSearch in conjunction with the Sex Offender Registry will provide a robust and well researched background check for all of your student athlete transfers.

Validity is a national enterprise that offers screening solutions for employers, volunteer organizations, and academic healthcare programs throughout the country. We've worked with Division I programs throughout the United States and have unparalleled compliance standards within the industry.
